

Hands On Workshop on LINUX Intermediate System Administration.

5 DAY WORKSHOP ON LINUX SYSTEM ADMINISTRATION

STARTING FROM 22 NOV 2010 TO 26 NOV 2010

Workshop Coordinator:

Muhammad Khalid Khan: Khalid is responsible for all the Bachelors and Masters programs offered in the field of Computer Science and Telecom & Networks at PAF-KIET. He has vast industry experience as well and has provided consultancy and training services to leading organizations that include but not limited to Pakistan Steel Mills, United Bank Limited, Allied Bank Limited etc. He is also the CEO of Institute of Enterprise Information System that provides consultancy and training services in the area of Enterprise Resource Planning and Information Systems Security and Audit.

Eulogy Technologies in collaboration with PAFKIET is offering a 5 days Intermediate Linux System Administration workshop. This training workshop is meant for professionals and system administrators from commercial and academic institutes. The LINUX OS is used by many leading companies to offer high levels of reliability, availability, security and scalability. The participants will learn how to provide and maintain their domain specific application and services on systems running any Linux clone. Also they may appear in an exam to become certified Linux Administrator. Such administrators are in high demand in the local and international markets.
